

# Cartography, geography, geographic information. Representation, visualization, analysis

## Organizers

Giuseppe Borruso, University of Trieste (Italy)

Andrea Favretto, University of Trieste (Italy)

Maria G. Riitano, University of Salerno (Italy)

Giuseppe Scanu, University of Sassari (Italy)

## Description

This session represents an opportunity to examine the link between cartography and geography, considering in particular the revolutions intervened with the advent of Geographic Information technologies (GIS, Remote Sensing and Global Navigation Satellite Systems) and, more recently, with the development of 'Web 2.0' and its geographical implications (Neogeography, Volunteered Geographic Information, etc.).

Geography and Cartography have been always tightly coupled together, in particular as cartography allows the representation of geographical entities and processes.

To-date cartography is enhanced and integrated by Geographical Information instruments, now widely used and manageable by researchers and scholars. Some of the issues related to geographical data are being solved, thanks to the recent initiatives from the public sector (Open Data, Spatial Data Infrastructures), the private one (i.e. Google Earth) and the so-called Volunteered Geographic Information (i.e., Wikimapia, OpenStreetMap), possible through the wide diffusion of electronic devices containing geo-referenced information. Such availability of data and software allows scholars and researchers to cope with many issues concerning geographical analysis and representation. However, such availability raises also new challenges and open new issues in geographical analysis. The sessions therefore represents an opportunity for scholars to exchange ideas and experiences on issues related to geographical analysis and reasoning on the cartographic representation and visualizations that can originate from that.

[Read the abstracts](#)

Slot 1

Sub-title: New experiences, new frontiers in cartography

Chair: Giuseppe Scanu

Discussant: Maria Prezioso

Presentation n. 1

Title: DAGOClaT, Digital Atlas with Geographical Ontology for Classical Texts

Author(s): Raffaella Afferni

Presentation n. 2

Title: Elections in maps. Web 2.0 and cartography in Italian general elections 2013

Author(s): Giuseppe Borruso

Presentation n. 3

Title: Class structures, social determinations and hysteresis : permanences and breakings in the electoral patterns. The geography of the left in Western Europe since the end of WWII

Author(s): Christian Vandermotten, Gilles Van Hamme

Presentation n. 4

Title: [Religious geo-data and geo-information: representation and visualization on the web](#)

Author(s): Raffaella Gabriella Rizzo - Luca Simone Rizzo

Presentation n. 5

Title: The "Neogeography" in relation to a development of cartographic modeling techniques for smart cities: mobility

Author(s): Brunella Brundu, Ivo Manca

Slot 2

Sub-title: Cartography and History

Chair: Maria Giovanna Riitano

Discussant: Giuseppe Borruso

Presentation n. 1

Title: [Quantification of deformations of Tunisian Modern Cartographic Heritage \(XV to XVIII century\)](#)

Author(s): Saada Afef

Presentation n. 2

Title: Disclosing the hidden geography of the Italian historical expeditions to Central Asia through the use of virtual globes.

Author(s): Laura Cassi , Francesco Zan

Presentation n. 3

Title: Rome in the 18th century: a GIS application in the field of urban history

Author(s): Keti Lelo

Presentation n. 4

Title: The Costa Blanca or the Western European Florida: Explaining the Urban Evolution of A Western Mediterranean Region through GIS (Corine, Siose) Data

Author(s): Joan Carles Membrado

Slot 3

Sub-title: Cartography, GIS and Remote Sensing (1)

Chair: Beniamino Murgante

Discussant: Beniamino Murgante

Presentation n. 1

Title: Georeference and map projections to nautical charts of Tunisia in catalog of the navy hydrographic service

Author(s): Saada Afef

Presentation n. 2

Title: Territorial grids: space versus population

Author(s): Yoann Doignon

Presentation n. 3

Title: Continuous Surface Cartograms for Census Data Re Presentation

Author(s): Giancarlo Macchi Jánica

Presentation n. 4

Title: Geography, spatial data analysis, landscape, GIS/web

Author(s): Giuseppe Scanu

Slot 4

Sub-title: Cartography, GIS and Remote Sensing (2)

Chair: Andrea Favretto

Discussant: Andrea Favretto

Presentation n. 1

Title: AppsForGis (A4G): platforms for real-time data collection, for sustainable mobility solutions and for optimized management of a fleet of vehicles and human resources over a territory

Author(s): Salvatore Amaduzzi

Presentation n. 2

Title: Geography of waste: spatial patterns of rural dumpsites from Romania

Author(s): Florin-Constantin Mihai

Presentation n. 3

Title: Accessibility to waste collection services in Romania. A multiscale analysis in EU context

Author(s): Florin-Constantin Mihai, Adrian Ursu

Presentation n. 4

Title: Marginality indicators and digital thematic maps in Campania

Author(s): Maria Giovanna Riitano

Presentation n. 5

Title: Seeing the forest from the trees: Analysis and Visualization of forest cover change in the Medvednica Nature Park, Croatia

Author(s): Luka Valozic, Marin Cvitanovic

Session code: S04

The best papers deriving from presentations will be published on peer-reviewed journals suggested by the Scientific Committee, including the 'Bollettino dell'Associazione Italiana di Cartografia' (contacts: Raffaella Gabriella Rizzo at [segretaria\\_cs@aic-cartografia.it](mailto:segretaria_cs@aic-cartografia.it)).

This session is an expression of the AIC – Associazione Italiana di Cartografia (Italian Association of Cartography, [www.aic-cartografia.it](http://www.aic-cartografia.it)) directed by Prof. Giuseppe Scanu ([gscanu@uniss.it](mailto:gscanu@uniss.it)).
